Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 112

The 112 rejections have been withdrawn in light of the amendments filed on 6/30/2009.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 6, 7, 10-11, 14, 25-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Sarnoff (US 3,797,489).

Sarnoff discloses an insertion device comprising a cannula (150), a protective element (100, 104) for accommodating the cannula in a retracted position (see Figure 1), an energy storing element (138) for expelling the cannula out of the protective element, a base body (158) removably connected to the protective element, wherein in the retracted position the cannula is positioned spaced apart from the base body (see Figure 1), and wherein the cannula is expelled from the protective element through an opening (the opening created by the cannula) in the base body, further comprising a holder (82, 136) having a connecting element (84) and a sealing element (148), and wherein the protective element can be disconnected from the base body after expulsion.

In regards to claim 25 and its dependent claims, Samoff discloses a cannula expelling device (150), an energy storing restoring element (210, 212), and a triggering element (200).

Allowable Subject Matter

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-7, 10-11, and 14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
